To the President of the Bulgarian Academy of Sciences  
Acad. N. Sabotinov

To the Director of Institute of Catalysis  
Bulgarian Academy of Sciences  
Prof. S. Rakovsky

Dear Sirs,

It is my honor to inform you at the beginning of the 2010 year about the successful cooperation in the frame of the Inter-academic Collaboration between the Institute of Physical Chemistry, Bucharest, Romanian Academy and Institute of Catalysis, BAS since 1993 year. The investigations are performed in the field of heterogeneous catalysis concerning new nanosized catalytic materials, kinetics of catalytic reactions and solid state quantum chemistry. These studies are important in view of the catalysts' design and selection, environmental protection, energy stocks, effective and wise utilization of light alkanes C<sub>1</sub>-C<sub>4</sub> as natural resources.

The joint research serves to enrich the knowledge, professional experience and represents the base for attracting of young scientists and the participation in present and future international projects and networks.

We would be interested to continue this cooperation and support the request of the Institute of Catalysis, BAS to remain as a separate structural unit of the Academy in order to preserve its present thematic directions.

Signature

Director

Dr. Mihai V. POBB
